PP THREADED FITTINGS

Pressure ratings

PN 10

Made from high-quality, impact-resistant polypropylene.

Resistant to UV rays, does not allow the growth of moss or bacteria.

The internal surfaces are homogeneous and non-porous.

Contains no harmful compounds that could alter the smell or taste of the water.

Usage information

A Teflon sealing element, etc., must be used to seal the threaded parts of the products.

The products must not be excessively stressed after the thread has been completed.
